## PIONEER TERRITORY

Think of Pioneer Territory as one gigantic open-air museum. Indeed, no other of Nevada's territories captures the essence and flavor of the Silver State's colorful "boom and bust" mining history than does this vast slice of central Nevada. This is truly the heart of the wild west, where the only law was a blazing six-gun and fortunes were made or lost in the span of a day. Stretching from Yerington in the northwest to Pahrump in the southeast, Pioneer Territory is the largest of the

five territories that comprise Nevada.

*(A Note To Travelers: While many ghost towns and attractions are easily accessible by passenger car, some can only be reached by dirt roads. Please take full advantage of Nevada's many Visitors Information Centers listed on the back of this brochure where you can obtain additional brochures and state road maps. A little advance planning can make your Pioneer Territory experience a lot more enjoyable.)*
